### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the instant claims are allowable over the prior art of record, because the prior art is silent to a fuel cell humidification apparatus comprising humidification means, wherein water vapor contained in exhaust gas expelled from the fuel cell penetrates through a water permeable membrane and is subsequently supplied to reformation means.

The prior art, such as Satoshi JP Pub. 2000-306594, teaches a humidification system wherein water vapor from cathode exhaust is mixed with raw fuel and charged to a reformer. The reference is silent to a humidifier with a water permeable membrane.

The prior art, such as Herdeg et al., U.S. Patent 6,696,186, teaches a humidification device wherein water vapor contained in cathode exhaust penetrates through a water vapor permeable membrane and then supplied to a fuel cell. The reference does not teach or suggest supplying the water vapor exhaust to reformation means.

The references of record are not combinable because Herdeg teaches against the humidification mixer of Satoshi (col. 2, lines 40-45). Therefore, the skilled artisan would not be motivated to replace one humidifier with the other, rendering the instant claims patentably from the prior art.

### CONCLUSIONS

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
